Myconos Introduction

The island of Myconos lies in the center of the Aegean, situated 96 nautical miles from Piraeus with an area of 85 square kilometers and a population of 6000 inhabitants. The famous holiday resort attracts thousands of visitors every year from all corners of the earth; jet setters, artists, intellectuals, sophisticated and many others.

The most outstanding features of the island are its dazzling brightness, the rich sandy beaches, the Town that rises amphitheatrically behind the quay, with the whitewashed houses, churches and the famous windmills situated in the Alefkandra quarter which is called "Little Venice".

When the night falls, the colors which paint the island, offer a romantic beauty that can hardly be found anywhere else in the world. The maze of streets constructed to confuse the attacking pirates centuries ago, still confuse the visitors today by making them feel lost in a dream with thousands of people around with boutiques, bars, discos and soft music coming from every corner.
